Cook	Don	ET1/SS	don@usspuffer.org	1985	1991	3/15/2016
<p>I started this web site in 1995, 21 years later the software has all changed and I haven't kept up with technology. The site has remained stagnant for many years; the best I seem to manage are these contact updates. Today, 3/15/16, is the 25th anniversary of my EOS. My navy time truly served me well.</p> <p>For 18 years I worked in operations at Vermont Yankee Nuclear Power Station as a licensed reactor operator and in refueling outage management. I then spent 5 years at Cooper Nuclear Station in Nebraska as Assistant Outage Manager. After that, I spent 16 months at Westinghouse working on the new AP1000 reactor plant construction in at their corporate headquarters in Cranberry Twp, PA.</p> <p>I now work project management for Exelon Power on new build gas turbine and biomass plants - presently in Albany, GA building AGE, Albany Green Energy, a 50MWe CHP plant that will provide process steam to the local Procter & Gamble Bounty and Charmin plant and electricity to Georgia Power.</p>

Twenty-five years later, I've finally started to appreciate what we did back then, and that most onboard were really good folks (but a few of them...). I've been able to reconnect with a small number of guys from the boat recently, and it's been nice.</p>
